- Our Brands

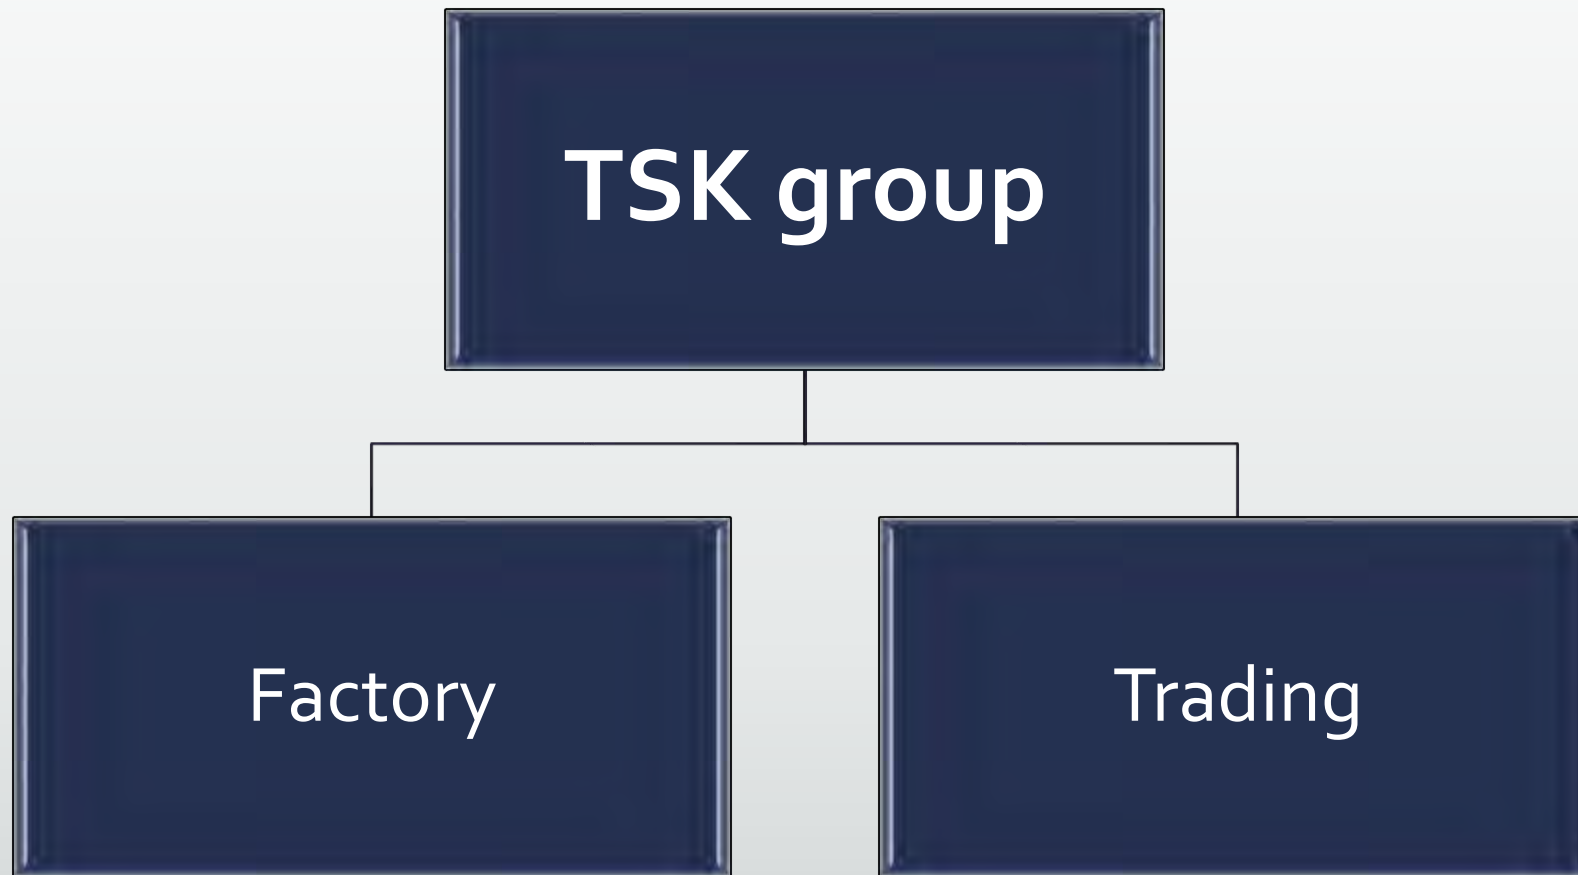

Brief History

- T.Sahakit shop started operation in 1991 with the start of business as a small wholesaler. After inheriting the expertise of highly experienced blacksmith from Father (Lim Seng), we can become a manufacturer of quality products to the market in Thailand and abroad.
- T. Sahakit Industry Co., Ltd. was established on February 2, 2001. First, the company focused on the wholesale and distribution of its products to the domestic market. When the distribution channels smoothly, we decided to invest in the construction of the factory to produce directly into the market. By combining modern manufacturing technology with hand-crafted techniques from the father, the products come out quickly and are very refined. Thus, our products are not only accepted by the domestic market widely, but also in many countries in Asia and Europe.
- At present , The company has expanded its business to include more than 9,000 square meters of office, warehouse and factory space.

About Us

- We are a Thai leader manufacturer of agricultural blades and spare parts for brush cutter and lawn mowers, including livestock equipment and other agricultural equipment.
- Our factory is located in Bang KhunThian Industrial Park, Bangkok. We produce with modern machinery, with continuous development, we can offer high quality products to our customers.
- Our flexibility and versatility allow us to improve production process and quality to match our customers' needs. We can offer competitive prices with satisfactory quantity
